CRAFT CATALOG

Rotary Cutters & Blades

Choosing the right size / What you need to know

18mm ROTARY CUTTER

Go-to size for intricate and precise work. Reliable choice for small, tight areas or miniature work, such as paper piecing, templates, and much more.

28mm ROTARY CUTTER

Perfect for intricate cuts and tight corners, cutting patterns, garment making, applique, quilting templates and other small scale projects.

45mm ROTARY CUTTER

Most common size rotary cutter - cuts up to 8-layers of cotton fabric in one pass. Great for a wide variety of projects and materials, including: cotton, leather, paper, vinyl, wool, and more.

60mm ROTARY CUTTER

The larger handle and blade are great for general and large cutting projects. Cuts up to 12- layers of cotton fabric with a single pass. Ideal for cutting cotton, wool, paper, vinyl, leather, foam, and other thick layers that require a deeper blade cut.

How to change your rotary blade

45 / 60mm Classic Rotary Cutter:

The stem holds the rotary blade.

45mm Ergonomic Rotary Cutter:

The metal washer should always be placed on the rotary cutter "bowl" curve up. The nut should be flat side up as shown.

60mm Ergonomic Rotary Cutter:

45mm Ergonomic Rotary Cutter with Decorative Blade:

Classic

The Original Rotary Cutter

The OLFA Classic Rotary Cutter is the original rotary cutter invented in 1979. Quality design and construction make this the perfect tool for projects big and small. The classically designed straight handle is simple yet efficient for cutting and works for both right- and left-handed users. The easy-to-use blade guard adds safety.

Whether you are a quilter, garment sewer, cosplay artist, or general crafter the Classic handle is great for cutting a variety of materials such as fleece, felt, cotton, wool, foam and more.

The RTY-2/G (45mm) uses OLFA 45mm replacement blades, which cut up to 8 layers of cotton fabric. The RTY-3/G (60mm) uses OLFA 60mm replacement blades, which cut up to 12 layers of cotton fabric.

Ergonomic

anti-slip grip and curved handle help reduce wrist and hand fatigue

now comes pre-loaded with an OLFA Endurance Blade!

dual-action safety lock prevents accidental opening or can be locked open for high-volume cutting

squeeze handle exposes blade for use and self-retracts for safety

hole for hanging

The OLFA Deluxe Ergonomic Rotary Cutter is designed for both right- and left-handed users. OLFA self-healing rotary cutting mats should always be used to avoid damage to your work surface, and extend your blade life. See page 33 for instructions on how to cut.

The RTY-2/DX* (45mm) uses OLFA 45mm replacement blades, which cut up to 8 layers of cotton fabric. The RTY-3/DX (60mm) uses OLFA 60mm replacement blades, which cut up to 12 layers of cotton fabric.

45mm Ergonomic accommodates OLFA decorative-edge blades

*The RTY-2/DX (45mm) rotary cutter is the only cutter compatible with OLFA's decorative-edge blades.

Quick-Change

45mm Quick-Change Rotary Cutter w/ Dual Blade Guard - RTY-2/NS
#1079060 | UPC# 0 91511 30099 4

Cutter perfectly combines powerful cutting with innovative safety. The innovative split-blade cover decreases blade exposure while easily adapting for right- and left-handed users. Simply slide back the blade cover on the side in use and begin cutting. The other half of the blade remains guarded for safety. Designed for comfort, this cutter features an anti-slip grip with integrated grooves to reduce slippage to work longer and safely.

Features included on all Quick-Change Rotary Cutters: Contoured handle with integrated finger grooves, single blade cover, for right- and left-handed users, and two-step blade change for ease.

Single click blade change

TIP: For general cutting remember you can use the backside of your rotary mat.

Specialty Chenille

Chenille Cutter - CHN-1

#1071929 | UPC# 0 91511 60083 4

USA Patented No. 7540094 / CANADA Patented No. 2515875

Add texture effortlessly. The OLFA CHN-1 Chenille/Textile Cutter is an easy-to-use specialty cutter that adds beautiful texture and dimension to textile work. The embossed S, M, L, LL indicate the channel guide "feet" width which range from 1/8" to 1/2". To select the desired guide, follow the red arrow, turning counterclockwise until you see the blade in the arrow window, of the selected channel guide. The blade is fixed; therefore does not rotate while cutting. When you need a fresh blade edge, follow the black arrow and turn clockwise to reveal the next blade segment. The Chenille/Textile Cutter is pre-loaded with a CHB blade - a double-honed, ultra-sharp black blade with 24 edges per blade. The CHB blade can only be used with the Chenille Cutter.

Chenille Cutter Blade - CHB

1 pk: 1071928 | UPC# 0 91511 60084 1

The CHB black blade is designed exclusively for use with the CHN-1 Chenille Cutter. This high-quality tungsten tool steel blade is double-honed and ultra-sharp for superior sharpness and durability. For use ONLY with the (CHN-1) OLFA Chenille Cutter.

Rotary Circle Cutter

Rotary Circle Cutter - CMP-3

#1057028 | UPC# 0 91511 60067 4

USA Patented Nos. 6889440 & 6983545 / CANADA Patented Nos. 2404640 & 2510543

Cutting perfect circles has never been easier. The OLFA CMP-3 Rotary Circle Cutter reduces stress on the wrist with its patented ratchet-dial handle. Simple to use, adjust the pivot-point on the arm to the desired size, between 1-1/2-inch to 8-3/4-inch wide circles. Insert the pivot point into the material/mat, hold the thick base of the ratchet, and rotate clockwise with firm pressure. The ratchet-action of the handle allows you to cut effortlessly using a "stirring the soup" motion with your ratchet handle. OLFA's Rotary Circle Cutter comes preloaded with a stainless-steel 18mm rotary blade (RB18). The cutter includes a built-in blade guard and plastic pivot-point guard for safe storage.

Blades

Straight Edge Rotary Blades

Over 40 years experience crafting the best rotary blade. Expert honing combined with premium Tungsten Steel deliver a straight edge rotary blade with exceptional sharpness and superior edge retention.

Endurance™ Rotary Blades

OLFA Endurance™ Rotary Blades cut twice as long*, meaning less blade changes and more productivity. Manufactured with premium tungsten steel, Endurance™ blades are created with a proprietary hardening process that delivers up to two times more blade life. Endurance™ blades are honed to be razor-sharp. The 45mm blade can cut up to 8- layers of cotton, while the 60mm blade cuts up to 12-layers of cotton.

*when compared to OLFA standard rotary blades

Rotary Mats

Double-Sided Self-Healing Rotary Mats

Double-Sided, Self-Healing Rotary Mats* are designed for use with OLFA rotary cutters to help extend the life of your rotary blade. Perfect for crafters or makers seeking a superior cutting surface to enhance any cutting projects. Constructed with a triple-layer heat welding process for long life, the 1.5mm thick, self-healing mat protects surfaces beneath the cut. Each mat is double-sided with markings on the front for precise cutting and a blank back for general cutting.

**Not for use with fixed blade knives.*

DOUBLE your BLADE life with an OLFA mat*

- *Through independent testing the leading competitive national brand 45mm standard rotary blades lasted:
- On average 280 yards on their self-healing rotary mat before the blade began to dull
 - On average 570 yards on an OLFA® Self-Healing Double-Sided Rotary mat before the blade began to dull

Designed to work together!

280 Yards

Leading competitive brand cutting system

750 Yards

OLFA® Cutting System

Independent testing confirmed the OLFA cutting system* cuts **470 more yards of fabric** than the leading competitive brand.

**OLFA rotary blade, rotary cutter and mat*

Folding Cutting Mats

Folding Cutting Mats provide the benefits of a full-size cutting mat in a convenient folding form. Simply fold the mat in half for storage or travel. The triple-layer heat weld and 2.5mm thickness can accommodate both rotary and fixed blades. The 12"x17" mat has a non-slip back for stability. OLFA Folding Cutting mats protect the surface beneath your cut and extend the life of your blades.

Scissors

Stainless Steel Scissors

Choose OLFA Precision Appliqué Scissors for any detailed cutting needs. Constructed from premium stainless-steel and expertly honed, these scissors are sharp from the base to the tip for a precise cut on any project. Each blade fully extends into the extra-large symmetrical handles for even pressure distribution and increased stability. A reinforced stainless-steel rivet ensures a smooth cut and secures the blade for lightweight to heavy-duty cuts. Use the Precision Appliqué Scissors to cut up to 6-layers of fabric. Ideal for stitchwork, thread, cloth, leather, and more.

5" Precision Appliqué Scissors - SCS-4
#1096876 | UPC# 0 91511 90025 5

Serrated Edge Scissors

Premium stainless-steel meets expert honing in the OLFA Serrated-Edge Scissors. The combination of one smooth and one serrated blade results in materials being drawn into the blades for smooth cutting. Each blade is fully sharpened to the tip and extends into the extra-large symmetrical handle assuring even pressure distribution and increased stability in every cut. Rounded, blunt nose adds safety. An industrial-grade stainless-steel rivet maintains blade positioning from lightweight to heavy-duty materials.

Art Knives

Beginner Craft Knife

Whether you are new to crafting or an experienced crafter, you can take safe cutting to the next level with the ESK-1 Beginner Craft Knife.

- safety-inspired blade covering for limited blade exposure
- for use by a variety of ages from age 8 and above, with adult supervision
- comfortable and easy-to-use lightweight body
- snap technology with four blade segments per blade stick
- convenient stand that doubles as a blade snapper and disposal for used blade portions

Beginner Craft Knife - ESK-1
#1139922 | UPC# 0 91511 22088 9

Beginner Craft Knife Blade - ESKB-1/2B

Art Knife - AK-1/5B

#9153 | UPC# 0 91511 40059 5

When projects call for a fine cut, choose this OLFA Art Knife. The pen-type knife comes pre-loaded with an acute pointed blade for precision and detail for both right- and left-handed users. A contoured handle with textured grip provides stable and comfortable cutting. The quick-spin system makes for easy and fast blade changes. Includes (5) KB replacement blades. Also fits KB4-S, KB4-R, and KB4-F.

Art Blade - KB

#9161 | UPC# 0 91511 50013 4

Designer Art Knife - AK-5

#1118073 | UPC# 0 91511 22001 8

Compact and lightweight, the Designer Art Knife allows you to focus on precision. This pen-type knife comes pre-loaded with an acute pointed blade for accurate and detailed cutting by both right- and left-handed users. The tapered handle can also be used for embossing, folding, and scoring. The quick-spin handle assures fast and easy blade changes. The blade case doubles as a knife stand when using or as a cover when transporting or storing. Includes (30) replacement blades.

Art Blade - KB-5B

#1124196 | UPC# 0 91511 43006 6

Cushion Grip Art Knife - AK-4

#9164 | UPC# 0 91511 60032 2

The Cushion Grip Art Knife is designed to fit perfectly in your hand for the optimal cutting experience. The acetone resistant handle features a cushion grip for comfort. The pen-like knife is slightly weighted towards the bottom for ideal balance and stability in your hand. It also has an anti-roll tab to keep the knife safely in your workspace. The quick-spin system provides fast and easy blade changes.

Includes: (2) KB4-S Precision Blades, (1) KB4-F Chisel Blade, and (1) KB4-R Curved Carving Blade.

Also fits OLFA KB Art Blade, KB4-NS Narrow Saw Blade, and KB4-WS Wide Saw Blade

Art Blade - KB

Multi-purpose blade.

Fits AK-1, AK-4.

25 pk: #9161 | UPC# 0 91511 50013 4

#11 Precision Art Blade - KB4-S

23° angled blade for precision on graphics and general art projects. Fits AK-1, AK-4.

5 pk: #9167 | UPC# 0 91511 50090 5

Narrow Saw Blade - KB4-NS

Ideal for wood and plastic projects that require a smooth and clean cut. Fits AK-1, AK-4.

3 pk: #9169 | UPC# 0 91511 50107 0

Wide Saw Art Blade - KB4-WS

For straight cuts in rigid materials such as plastic and wood. Fits AK-1, AK-4.

3 pk: #9170 | UPC# 0 91511 50108 7

Chisel Art Blade - KB4-F

For trimming, deburring, and making narrow crosscuts on plastics, films, and wood. Fits AK-1, AK-4.

5 pk: #9166 | UPC# 0 91511 50092 9

Curved Carving Art Blade - KB4-R

For detailed and intricate cuts on delicate materials. Fits AK-1, AK-4.

5 pk: #9165 | UPC# 0 91511 50091 2

Stainless Steel Snap-off Graphics Knife - SAC-1

#9150 | UPC# 0 91511 10027 3

Elevate your cutting with the 9mm SAC-1 Stainless-Steel Graphics Knife. This handy snap-knife is a must-have for projects cutting paper, cardboard, plastics, foam board, or other graphics materials. Preloaded with an acute, 30-degree angle blade for precision cutting. The blade is firmly secured by a stainless-steel channel with auto-lock detents for setting blade depth. The acetone-resistant handle makes this a great choice when moisture or clean-up is a concern. The pocket clip doubles as a blade snapper to easily access a fresh blade edge.

Snap-Off Art Blade - A1160B

#5007 | UPC# 0 91511 60016 2

Magnetic Touch-Knife - TK-3M/2P

#1136657 | UPC# 0 91511 22079 7

Perfect for the home or office. Use this handy pocket-sized cutter to open packages, create craft projects, or other small tasks. The stainless-steel blade auto-retracts for safety and can also be locked in place. An internal magnetic makes this handy tool easy to store in your workspace. Includes (1) lime green and (1) white cutter.

Compass Circle Cutter - CMP-1

#9911 | UPC# 0 91511 40014 4

Easily create perfect circles up to 6" diameter with the Compass Circle Cutter. The pivot-point slide quickly adjusts to change diameters. Simply place the pivot-point in place and rotate. The ultra-sharp fixed blade cuts a perfect circle. For use with paper, films, cardboard, and light wood. Includes 6 COB-1 blades.

Compass Circle Cutter Blade - COB-1

Replacement blade for Compass Cutter CMP-1. 3 blades per pack; 5 segments per blade.

#9911 | UPC# 0 91511 40014 4

Rotary cutting basics

Left-handed vs right-handed cutting

When cutting fabric or paper, right-handed individuals will have the bulk of the fabric to the right of the ruler. Left-handed individuals will have their fabric to the left of the ruler.

Table height

The best height for a cutting table is 2"-3" below your waist. If you extend and bend your cutting arm at a 90° angle, then drop it 2"-3", that is the height that is best. You want to be able to cut from a position standing above the fabric, allowing gravity to help the momentum of your arm. If your cutting table is too low, consider raising it using bed risers, often used in dorm rooms. You can also cut wood blocks or use restaurant size cans to raise it to the height you need.

Body position

Stand tall with your feet slightly apart. Position yourself so you are standing above the table, looking down at the fabric, with your arm able to reach across to the other side of the mat. Avoid hunching over the cutting table to reduce shoulder and back fatigue.

Holding the cutter

Hold your cutter comfortably with the end of the handle in the palm of your hand and your index finger on the ridge area above the blade. Your four fingers will be wrapped about the handle and your thumb will rest on the flat portion of the front of the handle. Your hand should be relaxed and not holding the cutter too tightly, just enough to control it. Open the blade when you are ready to cut. Never leave the blade in the open position unless you are cutting fabric.

Ruler hand positions while cutting fabric

When cutting, the hand not holding your cutter will be firmly placed on your ruler, over the fabric strip you are cutting. Place your thumb near the bottom of the ruler and your four fingers played a comfortable distance up the ruler, applying even pressure. Keep fingers away from the ruler's edge. Holding your cutter at a 45° angle, push the cutter along the ruler edge, away from your body. Never cut toward yourself. If you're cutting a long strip, stop and inch your fingers up the ruler into a new position and continue cutting. Don't lift the cutter from the fabric until you have completely cut your strip. Immediately close the cutter.

Which mat is right for your project?

Self-Healing Double-Sided Rotary Mats	Rotating Self-Healing Rotary Mats	Folding Cutting Mats	3mm Self-Healing Double-Sided Cutting Mats
1.5mm thickness	1.5mm thickness	2.5mm thickness	3.0mm thickness

LIMITED LIFETIME WARRANTY ON SPECIALTY CUTTERS, ROTARY CUTTERS, UTILITY KNIVES, AND ART KNIVES

Invest in products you can rely on with OLFA. We're proud of our craftsmanship and precision manufacturing, so we offer a limited lifetime warranty to original purchasers of participating products. As the original purchaser of an OLFA product, you can continue to take on work, craft or DIY projects for a lifetime.

This limited lifetime warranty gives you specific legal rights and you may also have other rights, which vary from state to state.

WHO MAY USE THIS WARRANTY?

OLFA extends this limited warranty only to the customers who originally purchased OLFA's specialty cutters, rotary cutters, utility knives, or art knives (collectively, the "Goods"). It does not apply to any subsequent owners or other users or transferee of the Goods.

WHAT DOES THIS WARRANTY COVER?

This limited lifetime warranty covers significant defects in material and workmanship from the date of purchase.

WHAT DOES THIS WARRANTY NOT COVER?

This warranty does not apply to the following products:

OLFA TouchKnife®, scissors, cutting mats, rulers or multi-purpose scrapers
All styles and models of replacement blades
Any products that are damaged, repaired, altered, tampered, reworked, or improperly used or stored
